

## Ending The Mask-Wearing Controversy

There has been an absurd amount of controversy over whether or not people should be wearing masks. We're tired of it, so we're doing our part to present the evidence and end the madness.

### **DISCLAIMER:**

**It's up to you to review this evidence and decide for yourself what to believe and how to act on this information. We are merely sharing what we feel are some of the best pieces of evidence to allow for the most efficient learning and action-taking process. What you believe and what you choose to do are your own responsibility, no one else's.**

We spent over a month compiling research on the subject of this "Epidemic", and have so much more that we're being asked to create a documentary series on the subject. We're also getting requests for a packet of information to educate business owners and stop them from forcing masks (which don't stop viruses) onto workers and help businesses fight unconstitutional rule-making: trying to force them to impose this unhealthy nonsense on both employees and the public.

### **The Trouble With Wearing Masks For Virus Protection:**

Viruses are so small, *normal* masks DON'T STOP THEM.

What do masks actually do *in this situation*?

Scare people into thinking they aren't safe, and therefore need to wear one to feel safe, while causing OXYGEN DEPRIVATION/ HYPOXIA <https://www.webmd.com/asthma/guide/hypoxia-hypoxemia> as well as CO2 poisoning [https://www.emedicinehealth.com/wilderness\\_carbon\\_dioxide\\_toxicity/symptom.htm!](https://www.emedicinehealth.com/wilderness_carbon_dioxide_toxicity/symptom.htm!)

### **"The most common hypoxia symptoms are:**

- Changes in the color of your skin, ranging from blue to cherry red
- **CONFUSION**
- Cough
- Fast heart rate
- Rapid breathing
- **SHORTNESS OF BREATH**
- Slow heart rate
- Sweating
- Wheezing" - according to WebMD (link above)

### **"Symptoms of carbon dioxide POISONING include:**

- NAUSEA,
- VOMITING,

- **DIZZINESS,**
- **HEADACHE,**
- rapid breathing,
- fast heart rate,
- and flushing (warmth, redness, or tingling of the skin).

**Symptoms of severe cases of carbon dioxide POISONING may include:**

- **CONFUSION,**
- **CONVULSIONS,**
- **AND LOSS OF CONSCIOUSNESS."** - eMedicineHealth (link above)

Driving with a mask, or while still experiencing symptoms, endangers you and your passengers! I personally interviewed several Lyft drivers on the effects of driving while forced to wear a mask. They reported that it makes you light-headed, causes headaches, dizziness, confusion, and makes them feel like they're suffocating.

It's WORSE, in many ways, than drinking alcohol! It causes many of the the same effects, and we all know you shouldn't drive intoxicated! You are endangering yourself and your passengers driving during/after wearing a mask! One nurse I questioned said it can take 3 days to recover from one work day of use!

This supposed protective action is NOT helping people; it's COMPROMISING THEIR HEALTH and creating unsafe conditions! One thing that isn't mentioned above, but is talked about by Dr. Bruce Lipton M.D. and other doctors interviewed on the subject, is that: all this fear puts your body into a panic "fight or flight" state that Takes Energy and Nutrients AWAY FROM THE IMMUNE SYSTEM and sends it to the muscles so you can RUN AWAY from the danger SUFFOCATING YOU. It makes you LESS CAPABLE of handling an illness/more vulnerable to catching and being overwhelmed by it! Your fear is a LITERAL SABOTAGE of your immune system!

See for yourself, in his own words: Dr. Bruce Lipton M.D. - Father of Epigenetics and other leading-edge science as a researcher and doctor TRAINER

Even the politically-influenced [Forbes](#) has this to say:

Even if there are cases next door, the answer is no, you do NOT need to get or wear any face masks—surgical masks, “N95 masks,” respirator masks, or anything else—to protect yourself against the coronavirus. Not only do you not need them, you shouldn’t wear them, according to infection prevention specialist Eli Perencevich, MD, a professor of medicine and epidemiology at the University of Iowa’s College of Medicine.

“The average healthy person does not need to have a mask, and they shouldn’t be wearing masks,” Dr. Perencevich said. “There’s no evidence that wearing masks on healthy people will protect them. They wear them incorrectly, and they can increase the risk of infection because they’re touching their face more often.”

But even if you know what you're doing and you tie your hands behind your back, you still don't need to wear a mask.

Only Wear A Mask If You're Sick
